PERSONAL STATEMENT

I am a full stack senior web developer with a perfectionist streak combined with an extensive 20+ years experience.

My knowledge of the web encompasses nearly every aspect from eCommerce and security to brand development, UI and design.

My track record is flawless and I infuse each project with passion and dedication.

I am interested in challenging opportunities with the right company.

SPECIALTIES

I have a great deal of experience in eCommerce, RESTful APIs, data analysis and SPAs (Single Page Apps).

My current personal projects are a good reflection of my interests.

Development of automated analysis and trading of the crypto currency market using machine learning and genetic algorithms.

Creation of an eCommerce oriented RESTful API providing visitor behavior analysis and automated content writing using machine learning.

SKILLSET

As an experienced developer I can pick up any new skill with ease. Listed is a, by no means exhaustive, subset of my current skillset. Well written, tested and documented code is always my standard.
